## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group III claims 24-37 and 39-41 in the reply filed on 4/22/09 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1, 2, 4-9, 18-23 and 38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/22/09.

### **Upon further review the Examiner requires an election of species within the elected group**

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are the hydrophilic spacer of claim 30 of formulae (Ia), (Ib), (Ic), (Id) and (Ie). The corresponding compound of claim 37 will be examined together with the elected hydrophilic spacer.

Art Unit: 1621

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 24-26, 30-31 are directed to a hydrophilic spacer comprising the species.  
Claims 27-29, 32-34 and 39-41 are directed to a complex that comprises a hydrophilic spacer as described in claim 24.  
Claims 35-37 are directed to a compound which comprises the same hydrophilic spacer as described in claim 24.

The following claim(s) are generic: 24-37 and 39-41

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species are materially different and have different structural requirements.

### ***Conclusion***

Claims 1, 2, 4-9 and 18-41 are pending

Claims 1, 2, 4-9, 18-23 and 38 are withdrawn

Art Unit: 1621

Claims 24-37 and 39-41 are subject to election of species requirement.
